HOBBIES AND INTERESTS

Reading and Writing

One of my hobbies is lecturing. I have been reading since I was very young. And with it came the interest in writing and creating my own histories.

Assemble models and 3D puzzles

Another of my hobbies is assembling different models and 3D puzzles, mainly the ones from famous monuments of other countries.

Playing videogames

I really enjoy playing video games in my free time. The ones I like the most are about exploring the world. Also, since I have been learning about programming, it's amusing to think about how their code is.
